

CHECKLIST ENVIRONMENTAL ASSESSMENT

Project Name: Land Breaking of tame grass/alfalfa former conservation reserve program acreage for conversion to dryland agriculture. State of Montana Lease Number 2177.	Proposed Implementation Date: Spring 2014
Proponent: Raymond A. Padgett, 229 Unita Park Dr, Billings Montana 59105	
Type and Purpose of Action: Surface lessee, Raymond A. Padgett has made a written request for breaking of tame grass/alfalfa on former conservation reserve program acreage to the Glasgow Unit Office of the Department of Natural Resources & Conservation. The surface lessee has requested permission to break an estimated 250.0 acres of tall wheatgrass, alfalfa and smooth brome grass formerly enrolled in the conservation reserve program. The land breaking would be a conversion from present use of tame grass/alfalfa to dryland agriculture for the purpose of growing small grain or pulse crops. The acreage would be reclassified from conservation reserve program acreage to dryland agriculture for small grain or pulse crop production.	
Location: E2, Section 36 Township 34 North Range 41 East	County: Valley

I. PROJECT DEVELOPMENT

1. PUBLIC INVOLVEMENT, AGENCIES, GROUPS OR INDIVIDUALS CONTACTED: Provide a brief chronology of the scoping and ongoing involvement for this project.	Raymond A. Padgett the surface lessee has made a request to break 250.0 acres (more or less) of tall wheatgrass; smooth brome and alfalfa, formerly conservation reserve program acreage on State land Lease Number 2177. The request was sent to the Department of Natural Resources and Conservation, Glasgow Unit Office for review and evaluation. The request will be reviewed per Department of Natural Resources and Conservation land breaking criteria for all lands other than native sod. The Glasgow Unit Office contacted the following government agency for comments: Montana Fish Wildlife and Parks, Region 6.
2. OTHER GOVERNMENTAL AGENCIES WITH JURISDICTION, LIST OF PERMITS NEEDED:	The other government agencies that may have jurisdiction for this project are the United States Department of Agriculture, Farm Service Agency and United States Department of Agriculture, Department of Natural Resources and Conservation Service.
3. ALTERNATIVES CONSIDERED:	<p>No Action Alternative: Deny permission to the Raymond A. Padgett to break 250.0 acres of former tame grass/alfalfa acreage. Under the no action alternative this acreage would be classified as dryland hay production.</p> <p>Action Alternative: Grant permission to the surface lessee to break 250.0 acres of tame grass/alfalfa acreage. The new land use will be dryland agriculture to produce small grain & pulse crops.</p>

--	--

II. IMPACTS ON THE PHYSICAL ENVIRONMENT	
RESOURCE	POTENTIAL IMPACTS
<p>4. GEOLOGY AND SOIL QUALITY, STABILITY AND MOISTURE: Are fragile, compactible or unstable soils present? Are there unusual geologic features? Are there special reclamation considerations?</p>	<p>No Action Alternative: The soils on the State land will remain the same and continue to produce tame grass/alfalfa vegetation. The area will continue to produce vegetation for haying.</p> <p>Action Alternative: This type of project will impact the soils that are currently producing tame grass/alfalfa vegetation. The soils will be broken up for the purpose of producing dryland small grain and pulse crops. The soil type that will be broken for dryland agriculture is: Williams loam, 2 to 9% slopes. The Williams loam is suitable for dryland agriculture. This soil type has moderate hazards to wind and water erosion. Telstad loam, 1 to 9% slopes. The Telstad loam is suitable for dryland agriculture. This soil type has a moderate wind hazard and moderate water erosion capability. Turner loam 0 to 2% slopes. The Turner loam has a moderate wind hazard and moderate water erosion capability. The lessee will mitigate impacts for the hazards of wind and water erosion. Through management practices such as continuous cropping and chemical fallow. The 250.0 acres requested for breaking will maintain current soil qualities and soil stability under dryland agriculture management.</p> <p>Mitigation: There will be areas of tract that may be flagged by Departmental personnel and left in permanent vegetative cover. The surface lessee plans to continuous crop or chemical fallow this acreage. The annual standing stubble will mitigate any type of soil loss from wind or water erosion...</p>
<p>5. WATER QUALITY, QUANTITY AND DISTRIBUTION: Are important surface or groundwater resources present? Is there potential for violation of ambient water quality standards, drinking water maximum contaminant levels, or degradation of water quality?</p>	<p>No Action Alternative: Under this alternative annual precipitation will be utilized by the tame grass/alfalfa plant community. There will be no impacts to water quality, quantity and distribution.</p> <p>Action Alternative: The project will allow the surface lessee to expand his dryland agriculture small grain and pulse crop production. The land breaking for small grain and pulse crops will not use water resources, other than the water associated with the topsoil from annual precipitation.</p>
<p>6. AIR QUALITY: Will pollutants or particulate be produced? Is the project influenced by air quality regulations or zones (Class I airshed)?</p>	<p>No Action Alternative: No impacts will occur to air quality under this alternative.</p>

II. IMPACTS ON THE PHYSICAL ENVIRONMENT	
	<p>Action Alternative: The breaking of the tame grass/alfalfa acreage for dryland agriculture purposes will have no impacts to the air quality of the State land.</p>
<p>7. VEGETATION COVER, QUANTITY AND QUALITY: Will vegetative communities be permanently altered? Are any rare plants or cover types present?</p>	<p>No Action Alternative: Under this alternative the current tame grass/alfalfa plant community will remain intact.</p> <p>Action Alternative: The breaking of the tame grass/alfalfa plant community will permanently destroy the current plant community on the project area. The tame grass/alfalfa community consisting of tall wheatgrass, smooth brome and alfalfa. The former conservation reserve program acreage contains no known rare plant species. This plant community is currently tame grass/alfalfa. There are no native vegetative plant communities in the former conservation reserve program acreage.</p>
<p>8. TERRESTRIAL, AVIAN AND AQUATIC LIFE AND HABITATS: Is there substantial use of the area by important wildlife, birds or fish?</p>	<p>No Action Alternative: The habitat types associated with a tame grass/alfalfa plant community will remain intact.</p> <p>Action Alternative: This type of activity will disturb the habitat types on the State land. The area of impact is a tall wheatgrass, smooth brome and alfalfa plant community. This type of tame grass/alfalfa plant community has limited habitat resources. There will be minimal impacts to the wildlife and upland bird resources associated with the State land. There will be some areas of tract that will continue to produce a tame grass/native grass plant community. The remaining native/tame grass plant community will provide some habitat resources for song birds, upland game birds, waterfowl, and whitetail deer. Montana Fish Wildlife and Parks were asked for their comments concerning this proposal. The Montana Fish Wildlife and Parks comments on this project are as follows: " I am writing to comment on the request to break 250 acres of formerly enrolled Conservation Reserve Program acreage on DNRC land in Valley County. A complete on-site of this lease was not possible due to winter weather. However, after reviewing the location via ArcMap and a MFWP mapping service. MFWP is not opposed to breaking some of the described lands for small grain production. MFWP appreciates you identification of the significant Snow Coulee stream drainage and would recommend that this, along with the associated wetlands and fingered drainages, be left in permanent vegetation with a 100 meter buffer to benefit reptile and amphibian use, upland game bird nesting cover, as well as for filtering pollutant runoff and limiting top soil erosion. Thank you for the opportunity of comment on this matter. FWP would also be very</p>

II. IMPACTS ON THE PHYSICAL ENVIRONMENT	
	interested in receiving documentation on what actions are being allowed in regards to this request". Mark Sullivan, Wildlife Program Manager, Region 6 Montana Fish Wildlife & Parks, Glasgow Montana
9. UNIQUE, ENDANGERED, FRAGILE OR LIMITED ENVIRONMENTAL RESOURCES: Are any federally listed threatened or endangered species or identified habitat present? Any wetlands? Sensitive Species or Species of special concern?	<p>No Action Alternative: Under this alternative there will be no change to the current environmental resources of tame grass/alfalfa hay lands.</p> <p>Action Alternative: The project area contains no known unique, endangered, fragile or limited environmental resources. The project area consists of flat to gently rolling terrain, with tall wheatgrass, smooth brome and alfalfa vegetation. There are small areas of native plant species located on portions of this tract. This native plant species site will see no impacts from the land breaking process. All drainages will be left intact for water runoff erosion control.</p>
10. HISTORICAL AND ARCHAEOLOGICAL SITES: Are any historical, archaeological or paleontological resources present?	<p>No Action Alternative: The project area has no known historical or archaeological sites and existing status would remain.</p> <p>Action Alternative: There are no known historical or archaeological sites on the project area that will be impacted. The project area was inspected by R. Hoyt Richards, Unit Manager from the Montana Department of Natural Resources and Conservation, Glasgow Unit Office for archaeological, historical and paleontological resources. There were no historical or archaeological sites identified during the on-site inspection.</p>
11. AESTHETICS: Is the project on a prominent topographic feature? Will it be visible from populated or scenic areas? Will there be excessive noise or light?	<p>No Action Alternative: There would be no impacts that would occur to the aesthetic values associated with the State land under this alternative.</p> <p>Action Alternative: The project site is located in a rural area and is visible to the general public from a county road. The project will have no impacts to the aesthetic values associated with the State land involved with this project or other surrounding lands. The aesthetic values of this area for the most part are dryland agriculture producing small grain and pulse crops. There are scattered tame grass/native rangelands in the vicinity of the project site. There are also scattered areas of conservation reserve program acreage scattered near project site.</p>
12. DEMANDS ON ENVIRONMENTAL RESOURCES OF LAND, WATER, AIR OR ENERGY: Will the project use resources that are limited in the area? Are there other activities	<p>No Action Alternative: There will be no demands on environmental resources of land, water, air or energy occurring under this alternative.</p> <p>Action Alternative: The project will place no</p>

II. IMPACTS ON THE PHYSICAL ENVIRONMENT	
nearby that will affect the project?	demands on environmental resources of land, water, air or energy. The nearby activities occurring on surrounding lands are the tillage of dryland agriculture acreage for the production of small grain and pulse crops. There are some scattered areas where livestock grazing occurs.
13. OTHER ENVIRONMENTAL DOCUMENTS PERTINENT TO THE AREA: Are there other studies, plans or projects on this tract?	<p>No Action Alternative: Under this alternative there would be no changes to existing plans, studies or projects that the Department of Natural Resources and Conservation may have occurring on the State land.</p> <p>Action Alternative: The breaking of the tame grass/alfalfa vegetation will not impact other projects or plans that the Department of Natural Resources and Conservation may have occurring on this tract of State land. The land breaking project will not impact surrounding deeded lands.</p>

III. IMPACTS ON THE HUMAN POPULATION	
RESOURCE	POTENTIAL IMPACTS AND MITIGATION MEASURES
14. HUMAN HEALTH AND SAFETY: Will this project add to health and safety risks in the area?	<p>No Action Alternative: No human health or safety risks would occur under this alternative.</p> <p>Action Alternative: The breaking of tame grass/alfalfa vegetation for dryland small grain or pulse crop production has minimal human health or safety risks.</p>
15. INDUSTRIAL, COMMERCIAL AND AGRICULTURAL ACTIVITIES AND PRODUCTION: Will the project add to or alter these activities?	<p>No Action Alternative: Under this alternative there will be no changes to current agriculture activities.</p> <p>Action Alternative: The project will enhance the surface lessee's ability to produce small grain and pulse crops on his State land lease. The production of dryland small grain and pulse crops on State land will also enhance the revenue generated for the School Trust.</p>
16. QUANTITY AND DISTRIBUTION OF EMPLOYMENT: Will the project create, move or eliminate jobs? If so, estimated number.	<p>No Action Alternative: There will be no impacts to quantity and distribution of employment.</p> <p>Action Alternative: The project will not impact the quantity and distribution of employment. The land breaking will be accomplished by the surface lessee or his designated hired labor force.</p>
17. LOCAL AND STATE TAX BASE AND TAX REVENUES: Will the project create or eliminate tax revenue?	<p>No Action Alternative: No local and state tax base and tax revenues would be impacted under this alternative.</p> <p>Action Alternative: The project will have no impacts on the local or state tax base.</p>

<p>18. DEMAND FOR GOVERNMENT SERVICES: Will substantial traffic be added to existing roads? Will other services (fire protection, police, schools, etc) be needed?</p>	<p>No Action Alternative: Under this alternative there will be no demands for government services.</p> <p>Action Alternative: The project will place no demands for government services.</p>
<p>19. LOCALLY ADOPTED ENVIRONMENTAL PLANS AND GOALS: Are there State, County, City, USFS, BLM, Tribal, etc. zoning or management plans in effect?</p>	<p>No Action Alternative: No impacts would occur to the locally adopted environmental plans or goals under this alternative.</p> <p>Action Alternative; The project will not impact locally adopted environmental plans and goals. The United States Department of Agriculture agencies (Farm Service Agency, Natural Resources and Conservation Service) will review this land breaking request by Raymond A. Padgett. The writer of this document envisions that they will approve of the land breaking request with there specific management plan of operation.</p>
<p>20. ACCESS TO AND QUALITY OF RECREATIONAL AND WILDERNESS ACTIVITIES: Are wilderness or recreational areas nearby or accessed through this tract? Is there recreational potential within the tract?</p>	<p>No Action Alternative: No impacts would occur to access and quality or recreation associated with the State land under this alternative.</p> <p>Action Alternative: The project area has minimal recreational values, some upland bird hunting and hunting whitetail deer in its current status. The land breaking project will have minimal impacts to the recreational values associated with this tract of state land. There will be no impacts to recreational values on other bordering lands. The bordering lands contain habitat for upland birds and whitetail deer. The bordering lands will provide hunting recreational values for upland birds and whitetail deer.</p>
<p>21. DENSITY AND DISTRIBUTION OF POPULATION AND HOUSING: Will the project add to the population and require additional housing?</p>	<p>No Action Alternative; No impacts will occur to density and distribution of population and housing under this alternative.</p> <p>Action Alternative: The project will not impact the density and distribution of the population and housing on this rural area.</p>
<p>22. SOCIAL STRUCTURES AND MORES: Is some disruption of native or traditional lifestyles or communities possible?</p>	<p>No Action Alternative; No impacts will occur to native or traditional lifestyles or communities under this alternative.</p> <p>Action Alternative: The project will not impact the social structures of the local communities.</p>
<p>23. CULTURAL UNIQUENESS AND DIVERSITY: Will the action cause a shift in some unique quality of the area?</p>	<p>No Action Alternative: No impacts will occur to the cultural uniqueness and diversity under this alternative.</p> <p>Action Alternative: The project will not impact the cultural uniqueness and diversity of the State land. The project will not impact cultural uniqueness and diversity of the surrounding deeded lands.</p>

24. OTHER APPROPRIATE SOCIAL AND ECONOMIC CIRCUMSTANCES:	<p>No Action Alternative: Under this alternative there will be no social or economic impacts that would occur</p> <p>Action Alternative: The cumulative affects of this project provides economic benefit to Raymond A. Padgett and the Department of Natural Resources and Conservation, State land School Trust Fund. The dryland agriculture acreage on the State land will increase Raymond A. Padgett's annual revenue from his State land lease holdings. The Department of Natural Resources will see additional revenue generated from this tract of State land for the School Trust.</p>
